INTRODUCING OUR CUT-TO-FIT[®] LEG ADJUSTMENT SYSTEM

This patented design is the result of extensive research and product development tried and tested in demanding environments around the world. Off the shelf it is currently available in hi-vis cargo trousers, technical coveralls and 3 styles of workwear trousers - straight leg, cargo style and ripstop. We can also make these to order for your specific application - minimum order quantities apply.

HOW IT WORKS

1. Select the desired length

2. Cut vertically first

3. Then cut across horizontally

4. Repeat on other side

Important! Please refer to the full instructions which are supplied with the product.

“FEATURING A PATENTED INNOVATION, OUR RUGGED LODEWORK COVERALLS AND TROUSERS ARE ALL MANUFACTURED WITH THREE PRE-HEMMED LEG LENGTHS AS STANDARD. THEY CAN THEN BE EASILY ADJUSTED BY CUTTING TO THE REQUIRED LEG LENGTH.”

SHORT (CUT BELOW UPPER SEAM)

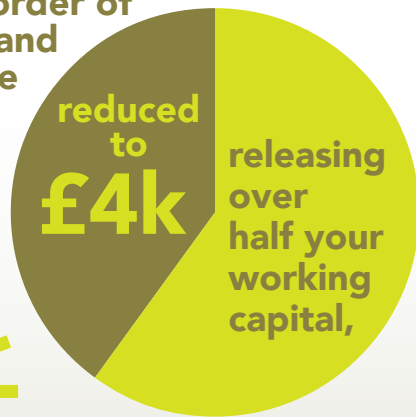

REGULAR (CUT BELOW CENTRE SEAM)

TALL (LEAVE UNCUT AS SUPPLIED)

CUT-TO-FIT[®] DELIVERS CLEAR BENEFITS:

Efficient management of stock purchases

A **£10,000** order of work trousers and coveralls can be

not to mention equivalent savings in third party adjustments and warehouse space.

- ▶ Unique Selling Point over competitive products
- ▶ Inventory saving of 60%
- ▶ Reduced SKUs - just order waist sizes
- ▶ Available on workwear trousers and technical coveralls (FR, Arc Flash and Weld)
- ▶ Complementary hi-vis polos and soft shell jackets
- ▶ Made to order variants as required
- ▶ Can also be made to order with sleeve length adjustment seams

INNOVATIVE. RUGGED. VERSATILE.
